TELOMERASE

Some time must pass before we eve our one, his roots into her loam, she parens her harder care, their wants curled above our votives snuffed, we that we shine with what wasn't to be, our precipice loves along molecular curves, his peninsular shunt and her crowning fetch, the scene of sense esteem, we back our fall with poison grace, that mystery of won't, his dominant will, under his rook, we adam our zero, now that we're slick with immersive gilt, now choke what's false with hooded truths, her tears upon his throat, before the venom of her gloar that gleamt the monster from its cave, our wrong mutancy

his chromatic flair, sisters and daughters shall gather at the center mere, our motives collect upon their ash till their laughter flames ascend to tongues that we may know the center bend of death's immortality

Spring rose, evening won, was celebrant focal more, and we'll feel the mighty nerve, that sorority of trust, we cling to the whether-stream, our blood of vacancy, her the sky with bodiful bursts and wake her ovaries, we with breeze, words guild of votaries cant save our whither-realm, pallid avoidance tagged, her torn verve strangles

Autumn fell, dawn forfeited, compliant with sun leaves, words pallor the master stroke, his wingsome sky with deathsmen, kill, their guilt upon our uesses, out pace, their winning ways in the spirit of reprint, if not the warrant parry, across that irksome scheme, terminally coy and spent toward we fail our watch when we strain for less, or mutiny absurd, they'll uncorne

their passion to persist, of discouraged words the agung his cancer tone er abdomitable sway, sustained messages beyond
